Rama Lana Komara

Full Stack Web Developer

+62 896 1423 8447 | rlanakomara7@gmail.com | Bogor, Indonesia
LinkedIn | GitHub | Portfolio

Full Stack Web Developer with a **Bachelor's Degree in Computer Science** and hands-on experience in full-stack web development applications using **React.js, Go (Golang), Gin Framework, and PostgreSQL.** Developed multiple web applications, including an independently built event management platform featuring 30+ UI screens, 17 database tables, and role-based access control (RBAC) for three user roles. Brings over seven years of experience in industrial quality assurance, with strong skills in root-cause analysis, systematic problem-solving, and cross-functional collaboration.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Router, Redux Toolkit, Context API, Responsive Design, Vite

Backend: Go (Golang), Gin Framework, REST API, RESTful API, JWT Authentication, Middleware, API Integration

Database & DevOps: PostgreSQL, SQL, Redis, Docker, Docker Compose, Linux/WSL, SSH

Tools: Git, GitHub, Postman, VS Code, npm, Figma

PROJECTS

EventHub – Event Management Web App **Aug 2026 – Sep 2026 · Individual project**

Frontend · Backend

- Built a full-stack event management platform independently in 6 weeks, delivering 30+ UI screens across public browsing, user dashboard, event creation, and admin flows.
- Designed a PostgreSQL database with 17 interconnected tables supporting 3 user roles (Attendee, Organizer, Admin) with role-based access control.
- Built a modular React.js frontend using Tailwind CSS, React Router, and Context API, featuring reusable components, nested layouts, and protected routes.
- Developed RESTful API endpoints in Golang (Gin) for users, events, communities, registrations, and admin operations.

ShortLink – URL Shortener Web App **Oct 2026 · Full-stack project**

Frontend · Backend

- Developed a full-stack URL shortener with React.js, Tailwind CSS, Golang (Gin), PostgreSQL, Redis, and Docker.
- Built RESTful APIs for authentication, URL shortening, custom slugs, link management, and redirection.
- Implemented JWT-based authentication, bcrypt password hashing, and protected routes; integrated Redis caching to optimize URL redirection.
- Built a responsive dashboard with login, registration, URL search, and pagination; managed migrations and Docker Compose services.

E-Wallet – Financial Management Web App **Oct 2026 · Collaborative project**

Frontend · Backend

- Collaborated on a full-stack E-Wallet app using React.js, Tailwind CSS, Golang, PostgreSQL, and Docker, with responsive layouts for mobile and desktop.
- Developed a responsive 3-step money transfer interface (Find People, Set Nominal, Finish), featuring recipient selection, currency formatting, transaction notes, PIN entry, and transfer summaries.
- Built React Hooks components for recipient search, favorites, transaction success and failed modals.
- Worked in a team using Git feature branches and shared UI components, following Figma designs.

MovieSpace – Movie Listing Web App **Jul 2026 · Frontend project**

GitHub

- Built a 5-page movie app (login, registration, guest mode, listing, detail) with HTML5, JavaScript, and Tailwind CSS.
- Integrated the TMDB REST API with Axios, rendering 100+ movies via pagination; detail page combines info and credits endpoints.
- Implemented client-side authentication with form validation, localStorage sessions, and a guest mode.

PROFESSIONAL EXPERIENCE

Quality Assurance (QA) – PT Anugerah Mortar Abadi (Triputra Group), Bogor **Dec 2019 – Jun 2026**

- Led quality improvement initiatives by analyzing customer complaints and root causes, reducing recurring defects.
- Conducted ISO 9001 internal audits across Finance and Procurement, tracking corrective actions.
- Drove Kaizen initiatives with Production, R&D, and Engineering through process optimization and quality data analysis, awarded 3rd Place QCC Improvement Competition 2025.

Final Inspection (Quality) – PT Suryaraya Rubberindo Industries (Astra Group), Bogor **Aug 2017 – Aug 2019**

- Conducted 100% final inspection of tire products against quality standards and technical specifications.
- Classified defects (OK/NG) and reported findings to Production to support corrective actions.
- Progressed from Junior to Middle to Senior Inspector with expanded responsibilities.

EDUCATION

Bachelor of Computer Science (S.Kom) – Universitas Indraprasta PGRI, Informatics Engineering **2019 – 2023**

Fullstack Web Developer – Koda Tech Academy, Bogor **Jul 2026 – Oct 2026**

- Developed responsive web applications using React.js, JavaScript, Tailwind CSS, React Router, and Redux Toolkit.
- Built RESTful APIs using Go (Golang), Gin Framework, and PostgreSQL, integrating frontend and backend functionality.
- Applied Git, GitHub, Docker, and Linux/WSL in development, deployment, and collaborative workflows.
- Completed individual and team-based full-stack projects, applying problem-solving, clean coding practices, and version control.

CERTIFICATIONS

- Fullstack Website Developer – Koda Tech Academy – 2026
- ISO 9001 Quality Management System – Ibeza Consulting – 2023
- Quality Assurance Management – SRZ CONSULTRAIN – 2021
